4.1 Description of fir	
4.1 Description of fir Inhalation	Get medical assistance if irritation develops or persists. If breathing is difficult,
Inhalation	Get medical assistance if irritation develops or persists. If breathing is difficult, move the person to fresh air. Give artificial respiration if person is not breathing.
	Get medical assistance if irritation develops or persists. If breathing is difficult, move the person to fresh air. Give artificial respiration if person is not breathing. For thermal burns, flush or submerge effected area in cold water to dissipate heat.
Inhalation	Get medical assistance if irritation develops or persists. If breathing is difficult, move the person to fresh air. Give artificial respiration if person is not breathing. For thermal burns, flush or submerge effected area in cold water to dissipate heat. Cover with clean bandage material. Do not peel material from skin. Get medical attention.
Inhalation Skin contact	Get medical assistance if irritation develops or persists. If breathing is difficult, move the person to fresh air. Give artificial respiration if person is not breathing. For thermal burns, flush or submerge effected area in cold water to dissipate heat. Cover with clean bandage material. Do not peel material from skin. Get medical attention. For contact at ambient temperatures, wash with soap and water.
Inhalation	Get medical assistance if irritation develops or persists. If breathing is difficult, move the person to fresh air. Give artificial respiration if person is not breathing. For thermal burns, flush or submerge effected area in cold water to dissipate heat. Cover with clean bandage material. Do not peel material from skin. Get medical attention. For contact at ambient temperatures, wash with soap and water. Immediately flush with plenty of water for at least 15 minutes.
Inhalation Skin contact Eye contact	Get medical assistance if irritation develops or persists. If breathing is difficult, move the person to fresh air. Give artificial respiration if person is not breathing. For thermal burns, flush or submerge effected area in cold water to dissipate heat. Cover with clean bandage material. Do not peel material from skin. Get medical attention. For contact at ambient temperatures, wash with soap and water. Immediately flush with plenty of water for at least 15 minutes. If irritation persists, get medical attention immediately.
Inhalation Skin contact	 Get medical assistance if irritation develops or persists. If breathing is difficult, move the person to fresh air. Give artificial respiration if person is not breathing. For thermal burns, flush or submerge effected area in cold water to dissipate heat. Cover with clean bandage material. Do not peel material from skin. Get medical attention. For contact at ambient temperatures, wash with soap and water. Immediately flush with plenty of water for at least 15 minutes. If irritation persists, get medical attention immediately. If swallowed, rinse mouth with water. Never give anything by mouth to an unconscious person.
Inhalation Skin contact Eye contact	Get medical assistance if irritation develops or persists. If breathing is difficult, move the person to fresh air. Give artificial respiration if person is not breathing. For thermal burns, flush or submerge effected area in cold water to dissipate heat. Cover with clean bandage material. Do not peel material from skin. Get medical attention. For contact at ambient temperatures, wash with soap and water. Immediately flush with plenty of water for at least 15 minutes. If irritation persists, get medical attention immediately.
Inhalation Skin contact Eye contact	 Get medical assistance if irritation develops or persists. If breathing is difficult, move the person to fresh air. Give artificial respiration if person is not breathing. For thermal burns, flush or submerge effected area in cold water to dissipate heat. Cover with clean bandage material. Do not peel material from skin. Get medical attention. For contact at ambient temperatures, wash with soap and water. Immediately flush with plenty of water for at least 15 minutes. If irritation persists, get medical attention immediately. If swallowed, rinse mouth with water. Never give anything by mouth to an unconscious person.
Inhalation Skin contact Eye contact Ingestion	Get medical assistance if irritation develops or persists. If breathing is difficult, move the person to fresh air. Give artificial respiration if person is not breathing. For thermal burns, flush or submerge effected area in cold water to dissipate heat. Cover with clean bandage material. Do not peel material from skin. Get medical attention. For contact at ambient temperatures, wash with soap and water. Immediately flush with plenty of water for at least 15 minutes. If irritation persists, get medical attention immediately. If swallowed, rinse mouth with water. Never give anything by mouth to an unconscious person. Do NOT induce vomiting. Consult a physician if necessary. Section 5 Fire Fighting Measures

Substance Name	Exposure Limit	Sources
Wax fumes	2 mg/m ³ TWA	NIOSH REL / ACGIH TLV
 8.2 Exposure controls Appropriate engineering controls Good general ventilation (typically 14 matched to conditions. Supplemental protection may be needed in special mechanical generation of dusts, etc. 8.3 Personal protective equipment Eye/Face Wear safety glasses equipped with si Hands Wear thermally resistant gloves and Skin/Body Prevent skin contact, wear long sleevent skin contact, wear long sleevent and for respiratory protection i ventilation. If elevated airborne contact use an air-purifying respirator. Folloo European Standard EN 149. Use a Nife 	0 air changes per hour) should be ry local exhaust ventilation, closed circumstances, such as poorly ven ide shields, or safety goggles. long sleeves if handling molten pr ves and/or coveralls. is not anticipated under normal us centrations above applicable work w the OSHA respirator regulations	d systems, or respiratory and eye ntilated spaces, very hot processing, roduct. se conditions and with adequate kplace exposure levels are anticipated, s found in 29 CFR 1910.134 or

Section 9 Phys	sical and Chemical Properties		
9.1 Information on basic physical and chemical prop	perties		
Physical State:	Solid		
Color:	Green		
Odor:	Mild		
Odor Threshold:	No data available		
pH:	Not applicable		
Melting Point:	>204°F (96°C)		
Boiling Point:	No data available		
VOC Content:	0		
Flash Point:	>378°F (192°C)		
Evaporation Rate:	No data available		
	No data available		
Flammability (solid, gas):			
Lower Explosion Limit:	No data available		
Upper Explosion Limit:	No data available		
Vapor Density:	No data available		
Specific Gravity:	0.9 ± 0.05		
Water Solubility:	Insoluble		
Partition Coefficient: n-octanol/water:	No data available		
Auto-Ignition Temperature:	No data available		
Viscosity:	Solid at room temperature		
Explosive Properties:	Not explosive		
Oxidizing Properties:	Not an oxidizer		
Section 10	0 Stability and Reactivity		
10.1 Reactivity:	No dangerous reaction known under conditions of normal use.		
10.2 Chemical stability:	Stable under recommended storage conditions.		
10.3 Possibility of hazardous reactions:	Hazardous polymerization does not occur.		
10.4 Conditions to avoid:	Heat, sparks, open flame. Avoid dust formation. Strong oxidizing agents.		
10.5 Incompatible materials:			
10.6 Hazardous decomposition products	In case of fire hazardous decomposition products may be		
	produced: carbon monoxide, carbon dioxide, irritating smoke.		
Section 11	Toxicological Information		
11.1 Information on toxicological effects			
Acute Toxicity – Dermal	No data available		
Acute Toxicity – Inhalation	No data available		
Acute Toxicity – Oral	No data available		
Skin Corrosion/Irritation	Classification criteria not met		
Serious Eye Damage/Eye Irritation	Classification criteria not met Classification criteria not met Classification criteria not met Classification criteria not met		
Respiratory or Skin Sensitization			
Germ Cell Mutagenicity			
Carcinogenicity	No component of this product present at levels greater than or		
Carcinogenicity	equal to 0.1% is identified as a known or anticipated carcinoger by IARC, NTP, or OSHA.		
Reproductive Toxicity	Classification criteria not met		
Specific Target Organ Toxicity (STOT)	שמששות מווערו ורדו זמ ווער וווכר		
Single Exposure	No data available		
	No data available		
Repeated Exposure Aspiration Hazard	No data avallable Not relevant
