

Ferris Mold-A-Wax

Description

Ferris Mold-A-Wax is a malleable wax for producing free-form jewelry and sculptures through the lost-wax process. It can be rolled, bent, twisted, shaped, or injected into an infinite variety of designs, including leaves, petals, figures, and animals.

- **No. 6 Red Mold-A-Wax (soft):** This versatile wax is a softer version of the discontinued No. 5 Black Mold-A-Wax and can be used for the same applications. It is also preferred for repairing wax patterns, joining File-A-Wax sections, as a stone-setter's "pick-up wax" or as an engraver's transfer wax.

Physical Properties

Ring & Ball Melting Point (°F)	150° (+/- 6°)
Flash Point (°F)	465°
