

Section 1 Chemical Product and Company Identification				
Product identifiers	HMIS			
Product name: 2-AB200 Freeman Classic Clay Brown - Firm	H 0			
Relevant identified uses of the substance or mixture and uses advised against	F 1 R 0			
Identified uses: Modeling clay used in the art bronze industry				
Uses advised against: None known	PPE			
Details of the supplier of the safety data sheet	Sec.8.			
Freeman Manufacturing & Supply Company				
1101 Moore Road, Avon, OH 44011 Talankana (440) 024 1002				
Telephone (440) 934-1902 24 Hour emergency telephone number: CHEMTREC (800) 424-9300				
Section 2 Hazards Identification				
GHS Classification				
This product is not a hazardous as defined in 29 CFR 1910.1200 (OSHA HCS)				
GHS Label elements, including precautionary statements Not a hazardous substance or mixture.				
Hazards not otherwise classified (HNOC) or not covered by GHS				
None known				
Section 3 Composition/Information on Ingredients				
Mixture				
Proprietary mixture of non-sulfur fillers, waxes, resins, polymers, and pigments				
Quartz and titanium dioxide are naturally occurring components of an ingredient us preparation. In this product the quartz and titanium dioxide are not airborne, unbou of respirable size and do not present a health hazard.				
Section 4 First-Aid Measures				
Description of first aid measures				
If inhaled				
Not anticipated to be an inhalation risk. Avoid exposure to fumes if the product is				
overheated/molten. Move to fresh air. Get medical advice/attention if you feel unwe	ell.			
In case of skin contact				
Modeling clay is normally used with no skin protection. If irritation appears, it may be an allergi				
reaction. Discontinue use and seek medical attention if symptoms persist. In case of eye contact				
Immediately flush eyes thoroughly with water for at least 15 minutes.				
If irritation persists, get medical assistance				
If swallowed				
Do not induce vomiting. Get medical advice/attention.				
Most important symptoms and effects, both acute and delayed				
Contact with molten product may cause severe burns to skin and eyes. Burns should be treated				
as thermal burns. The material will come off as healing occurs; therefore, immediate removal				
from skin is not necessary				
Indication of any immediate medical attention and special treatment needed				
Treat symptomatically.				

Section 5 Fire-Fighting Measures

Suitable extinguishing media

Use water fog, alcohol-resistant foam, dry chemical or carbon dioxide.

Unsuitable extinguishing media

Do not use water jet as an extinguisher, as it may spread the fire.

Special hazards arising from the mixture

Watch footing on floors and stairs because of possible spreading of molten material. Material can create slippery conditions. In case of fire hazardous decomposition products may be produced such as: Carbon dioxide, carbon monoxide and complex hydrocarbons.

Special protective equipment and precautions for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

Do not breathe fumes. Move containers away from fire area if safe to do so.

Section 6 Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

Avoid breathing vapors. Eliminate all sources of ignition. For personal protection see section 8.

Methods and materials for containment and cleaning up

Sweep up the spilled material. If it is clean, place in a suitable container for use. If it is contaminated, collect in a suitable container for disposal. Note that pelletized product can travel some distance when spilled. Prevent the spillage entering drainage channels.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

Section 7 Handling and Storage

Precautions for safe handling

Use only in a well ventilated area and avoid breathing fumes. Avoid eye contact. Avoid skin and eye contact with molten material. Do not eat, drink or smoke while using this product.

Conditions for safe storage, including any incompatibilities

Keep product closed in its original packaging until used. Keep dry; avoid temperature extremes (keep between 5 & 30° C / $41 \& 86^{\circ}$ F) and direct sunlight. Keep away from sources of ignition, oxidizing agents and other chemicals.

Specific end use(s)

Avoid heating above 100°C (212°F).

Section 8 Exposure Controls/Personal Protection

Occupational exposure limits

Substance	Long term exposure limit (8 hr. TWA reference period)	Reference
Paraffin Wax CAS # 8002-7	2 mg/m ³	USA - NIOSH

Appropriate engineering controls

Good general ventilation should be used. If applicable, use local exhaust ventilation or other engineering controls to maintain airborne levels of fume or vapor (molten product) below recommended exposure limits.

Section 8 Exposure Controls/Personal Protection continued

Personal protective equipment **Eye/face protection** With product at ambient temperatures, use safety glasses. Hand Protection Wash hands after use **Respiratory Protection** The need for respiratory protection is not anticipated under normal use conditions and with adequate ventilation. If elevated airborne concentrations are anticipated, a NIOSH-approved respirator with organic vapor cartridge and full face piece should be used. **General Hygienic Practices** Avoid contamination of food, beverages, or smoking materials. Wash thoroughly after handling, and before eating, drinking or smoking. **Section 9 Physical and Chemical Properties** Appearance Waxy brown solid **Odor** Characteristic **Odor Threshold** No data available No data available рH **Freezing point** No data available Initial boiling point & boiling range No data available **Flash point** No data available **Evaporation rate** No data available Flammability (solid, gas) No data available **Upper/lower flammability** No data available **Vapor Pressure** No data available Vapor density No data available **Relative density** No data available Water Solubility Soluble **Coefficient: n-octanol/ water** No data available **Auto-ignition temperature** No data available Viscosity Solid at room temperature Section 10 Stability and Reactivity Reactivity None known **Stability** Stable as supplied Possibility of hazardous reactions None known **Conditions to avoid** Avoid molten state. Excessive thermal exposure will oxidize the product. Generation of gas during decomposition can cause pressure in closed systems. Avoid static discharge. **Incompatible materials** Strong acids, strong bases, strong oxidizing agents. Decomposition products depend on air supply and Hazardous decomposition products the presence of other materials. They can include and are not limited to: carbon dioxide, carbon monoxide, alcohols, ethers, aldehydes and carboxylic acids.

Section 11	Foxicological Information				
Information on likely routes Inhalation	None known				
Skin contact	No adverse effects due to skin contact are expected. Molten				
Shin contact	product will cause thermal burns on contact with the skin.				
Eye contact	Molten product will cause thermal burns on contact with				
	the eyes. Solid product may produce irritation upon				
Ingestion	contact with the eye. No data available				
ingestion					
Skin corrosion/irritation	No data available on product.				
Serious eye damage/irritation	No data available on product.				
Respiratory or skin sensitisation	No data available on product.				
Germ cell mutagenicity	No data available on product.				
Carcinogenicity	No data available on product.				
	Long term exposure to crystalline silica can cause lung				
	injury (silicosis). IARC and NTP have determined that				
	crystalline silica inhaled from occupational sources can				
	cause cancer in humans. Risk of injury is dependent on the				
	duration and level of exposure. This product does not				
Tovicity for poppoduction	contain respirable crystalline silica.				
Toxicity for reproduction STOT – repeated exposure	No data available on product. No data available on product.				
Aspiration hazard	No data available on product.				
Aspiration hazaru	No data available on product.				
Section 12	2 Ecological Information				
Toxicity	No data available				
Persistence and degradability	No data available				
Bioaccumulative potential	No data available				
Mobility in soil	No data available				
Results of PBT & vPvB assessment	No data available				
Users of the product should ensure the					
-	Users of the product should ensure that it is stored, handled and disposed of in such a manner				
that it is not released to the environment. Spent material from the flash fire furnace or autoclave					
must therefore be stored in such a manner as to prevent environmental contamination, either by solid product or rain water run-off from it.					
Section 13 Disposal Considerations					
Contact a licensed contractor for date	ailed recommendations. Dispass of in accordance with all				
Contact a licensed contractor for detailed recommendations. Dispose of in accordance with all applicable Federal, state, and local regulations.					
Section 14 Transport Information					
DOT Not Regulated					
IMDG Not Regulated					
IATA Not Regulated					

Section 15 Regulatory Information

US Federal Regulations

TSCA: All components of this product are listed or exempted from listing on the United States Environmental Protection Agency Toxic Substances Control Act (TSCA) inventory. EPCRA section 302: This material contains no extremely hazardous substances SARA 311/312: None SARA 313: Not applicable

US State Regulations

California Proposition 65: None

This product contains silica, crystalline and titanium dioxide which are neither airborne, nor unbound particles of respirable size.

Section 16 Other Information

Disclaimer

The following supersedes Buyer's documents. SELLER MAKES NO REPRESENTATION OR WARRANTY, EXPRESSED OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. No statements herein are to be construed as inducements to infringe any relevant patent. Under no circumstances shall Seller be liable for incidental, consequential or indirect damages for alleged negligence, breach of warranty, strict of liability arising in connection with the product(s). Buyer's sole remedy and Seller's sole liability for any claims shall be Buyer's purchase price. Data and results are based on controlled lab work and must be confirmed by Buyer by testing for its intended conditions of use. The product(s) has not been tested for, and is therefore not recommended for, uses for which prolonged contact with mucous membranes, abraded skin, or blood is intended; or for uses for which implantation within the human body is intended.
